# Welcome to Company

## About us

ICSS LLC is an international company in the field of supplies and services, founded in 2021 in the Republic of Azerbaijan. One of company's main areas of activity is supply of products and provision of engineering, construction services in Oil & Gas sector.

Our team constantly exchanges experience with manufacturers and end users in order to improve product quality and delivery periods .

Our vision is to operate and develop ICSS as a leading products and services provider to satisfy our customers' demand. We do our best to exceed our customers' expectations by continuously diversifying and improving quality of our services.

Our comprehensive range of services provides innovative, effective, strategic and cost-efficient solutions to all our clients' technical and management needs. We combine technology, experience, and an abiding commitment to teamwork, to meet the needs of our clients. We provide full-service engineering, construction, operations and maintenance support to clients in our industry sectors.

**We are implementing our system on entire supply chain process, including organizing and supervising optimal delivery of goods from production plants to the consumption locations.**

With a huge global network and professional operations team we are able to satisfy your requests with best offers and solutions. We have long term business relations with top manufacturers all over the world what gives us opportunity to supply our clients in both price and quality policy .

# Quality and Safety

At the ICSS Group we believe that maintaining the highest quality standards is what drives our success. We are aiming for excellence in Health, Safety and Environment (HSE) by Zero Harm culture. Our Quality and HSE Policy is not only to meet, but to exceed the expectations of our customers and employees by providing quality and safe services.

We believe that business success depends on our ability to continually improve the quality of our products and services while protecting people and the environment.

We are operating in accordance with set of relevant certifications. ICSS is certified in accordance with ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 management systems.

Our commitment is to operate in the best interests of all our stakeholders: customers, employees, contractors and the communities in which we live and work. Our team is constantly developing through relevant trainings and educational programs around the world. We are constantly developing our operations team joining international training programs and courses around the world. Our main goal is zero incidents and healthy environment.

# Our Products

Any kinds of metal pipes

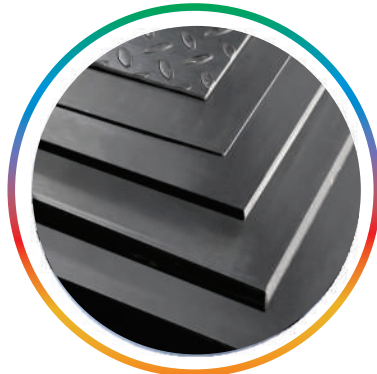

Sucker Rods

Polished Rods

Steel wire rope

Steel sheets

Offshore/Onshore drilling rigs

ROD pumps

Drilling fluids

Special Drilling equipment

Lifting equipment

Fittings, connecting links

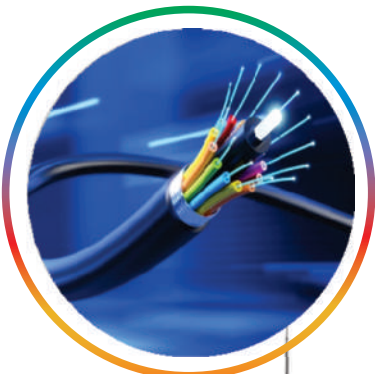

Construction Materials

Gate Valve

Offshore electric cable

Fiber Optic

Lightning rods

Drill Bits

# Our Services

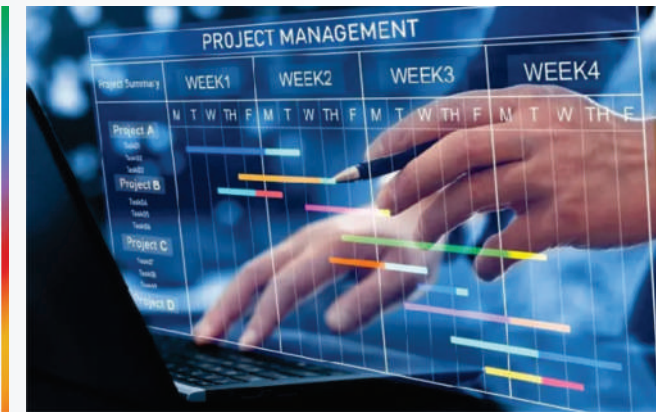

## Oil production development

Our engineers are able to optimize the oil production in different type of wells . We will do individual analyses of each well and provide the best solution with the latest technologies that have proven themselves in many projects around the world

## Waste management

ICSS is one of leading providers of integrated environmental solutions. We partner with our customers and communities to manage and reduce waste from collection to disposal while recovering valuable resources and creating clean, renewable energy.

## Project management

We specialize in planning, coordinating, and executing projects according to your specific requirements and constraints. We perform some or all of the activities related to project work, from conceptualization to completion. Emphasis is placed on creating and maintaining project milestones and the project schedule. The end goal is to complete the project on time and within budget.

## Scaffolding

We provide reliable and secure scaffolding solutions for a wide range of construction and maintenance projects. Our services include the design, erection, and dismantling of scaffolding systems tailored to meet the specific needs of each site. With a focus on safety, efficiency, and compliance with industry standards, our experienced team ensures stable and accessible platforms for all types of work at height. Whether for residential, commercial, or industrial applications, we deliver scaffolding solutions you can trust.

## Onshore/offshore drilling rigs inspection and maintenance services

We do perform Inspection of onshore/offshore drilling rigs with detailed examination in the visual and operational aspects in which every part of equipment is thoroughly inspected to ensure that they are fully functional for operations.

## Pipe maintenance and inspection services

Our pipe yard is fully equipped with all necessary equipment to perform different type of inspections such as NDT, MPI, UT, EMI and EDDY Current . At the same time we can meet your maintenance requests such as threading and cutting .

## Production equipment

We design and manufacture specialized equipment primarily for our own operational needs, ensuring maximum efficiency, reliability, and quality control across all projects. By producing key tools and components internally, we maintain full oversight of performance standards and adapt quickly to project-specific requirements. This capability enhances our productivity and reinforces our commitment to delivering safe, high-quality results on every job site.

## Rental of special drilling

Our rental fleet covers the majority of geotechnical and drilling equipment (including engineering team and consumables) for a day, weeks or several months.

# Our Capabilities in Action

At ICSS, we take pride in consistently delivering top-tier solutions tailored to the needs of both public and private sector clients. Across industries and sectors, we provide end-to-end solutions—from construction and engineering to supply chain and logistics—backed by technical excellence and a strong commitment to our clients. Our recent projects highlight the breadth of our expertise and our commitment to quality, safety, and reliability.

These projects reflect not only our operational capabilities but also our strategic partnerships with government and industry leaders. Whether through services or material supply, we remain committed to supporting our clients' missions with professionalism, technical expertise, and a focus on long-term value.

Explore some of our recent projects. A selection of projects showcasing our expertise in construction, industrial supply, and infrastructure development.

- **Telecommunication Infrastructure**

In our ongoing efforts to support the digital transformation and connectivity goals of major telecom providers, ICSS partnered with Azerconnect to deliver essential groundwork and installation services for communication infrastructure.

As part of this project, we were responsible for the construction and installation of communication lines, ensuring reliable and secure transmission capabilities. In addition, we carried out the design and installation of foundations to support the telecom equipment and structural elements required for stable, long-term operation.

This project demanded precise engineering, adherence to telecom industry standards, and close coordination with Azerconnect's technical teams. Our work laid the physical groundwork for enhanced communication services and digital infrastructure, contributing to broader national connectivity initiatives.

- **Installation of Lightning Protection Systems**

We are proud to announce the successful completion of a major infrastructure protection project involving the supply and installation of more than 350 lightning rods for the Ministry of Defence of the Republic of Azerbaijan. This extensive undertaking reflects our technical expertise, commitment to safety, and ability to execute large-scale, high-security installations with precision and reliability.

The project encompassed multiple defence facilities and critical infrastructure sites, each with its own unique structural and environmental challenges. Working closely with ministry engineers and security personnel, our team conducted detailed site assessments, risk analyses, and system designs to ensure optimal lightning protection tailored to each location.

Scope of Work Included: Comprehensive site surveys and risk assessments; Design and engineering of lightning protection systems in compliance with international and defence standards; Installation of over 350 lightning rods, including advanced air terminals and earthing systems; Coordination with ministry security protocols to ensure minimal disruption to ongoing operations; Testing, certification, and commissioning of all installations.

The project marks a significant milestone in our company's portfolio and reinforces our role as a trusted partner in national infrastructure protection. Our ability to deliver critical safety systems on time and to the highest quality standards demonstrates our team's technical capability and unwavering commitment to excellence.

This achievement not only enhances the safety and operational continuity of critical defence infrastructure but also showcases our capacity to deliver under the highest standards of scrutiny and security. The success of this project is a testament to our team's professionalism, technical knowledge, and ability to work seamlessly within highly regulated environments. It also reinforces our ongoing mission to provide robust, future-ready protection systems that safeguard lives, assets, and national interests.

# Our Capabilities in Action

- Tank Cleaning, Renovation, and Restoration

We are proud to highlight our successful collaboration with number of operating companies on a major industrial maintenance project focused on the cleaning, renovation, restoration, and painting of storage tanks critical to their operational infrastructure. This project showcased our multidisciplinary capabilities and our commitment to delivering safe, efficient, and high-quality services aligned with international industry standards.

The project began with a detailed assessment of the condition of several above-ground storage tanks, which were essential to the company’s ongoing operations. Our team carried out full internal and external cleaning, utilizing specialized equipment to safely remove sludge, sediment, and contaminants without compromising environmental safety. Following cleaning, we conducted structural evaluations to identify corrosion, material fatigue, and areas requiring repair.

Based on our findings, we undertook extensive renovation and restoration work. This included welding and replacement of damaged components, reinforcement of structural elements, and the preparation of all surfaces through sandblasting and other methods to ensure optimal adhesion of protective coatings. The tanks were then coated with industrial-grade, corrosion-resistant paints, specifically selected to extend service life and withstand the demanding environmental conditions of the region.

Throughout the project, all work was performed in strict compliance with health, safety, and environmental (HSE) standards. Our team followed industry best practices and adhered to both local regulations and international standards, ensuring the highest level of quality control and safety for both personnel and the surrounding environment.

The successful and timely delivery of this project strengthened the operational reliability of clients’ storage infrastructure and further solidified our reputation as a trusted provider of industrial maintenance and restoration services. We remain committed to supporting our clients with solutions that combine technical precision, durability, and long-term value.

- Reliable Supply of Metal and Metal Products A Track Record of Quality and Performance

Over the past six months, our company has successfully supplied approximately 10,000 tons of metal and metal products to a wide range of industrial clients across the region. This achievement stands as a testament to our logistics capability, product quality, and unwavering commitment to client satisfaction.

Our extensive inventory and strong supply chain partnerships have enabled us to deliver a broad spectrum of products tailored to the specific needs of our customers. These supplies have included, but were not limited to:

- Steel sheets and plates (various grades and thicknesses)
- Wire ropes and cables for industrial and marine applications
- All types of pipes – seamless, welded, galvanized, and stainless steel
- Reinforcement bars (rebars) for civil and structural engineering projects
- Angles, beams, and channels used in construction and fabrication
- Custom-fabricated components and fittings as per project requirements

Our clientele during this period has included some of the most prominent and demanding organizations in the region, such as SOCAR and its subsidiaries, Balakhani Operating Company (BOC), Surakhani Operating Company (SOC), Azgerneft, Binagadi Oil, GL (TOC, Salyan Oil), Gulf Drilling, BP subcontractors such as: Franklin Offshore International, Halliburton, Nobel Group, Caspian Drilling Company. Ministry of High Technologies and Transport, Ministry of Defense, State Border Service are also among our clients. These partnerships reflect the trust our clients place in us to deliver not only the required materials but also the assurance of on-time delivery, full compliance with specifications, and consistent product quality.

Each order was executed with careful attention to detail — from material sourcing and quality inspection to packaging, transportation, and documentation. Our logistical coordination ensured timely deliveries even under tight deadlines, contributing directly to the success of our clients’ ongoing operations and projects.

Client feedback has been overwhelmingly positive, highlighting our responsiveness, technical support, and the high standard of our materials. Our performance in this period reinforces our reputation as a reliable, customer-focused supplier in the metal products sector.

As we move forward, we remain committed to expanding our supply capacity, optimizing our logistics network, and exceeding the expectations of every client we serve.
